## Project Details

Name of the Project	Mobile App for Direct Market Access for Farmers
Language used	<i>XML, Java, Backend:-Firebase</i>
Description	Farmers often face challenges in accessing markets, leading to lower income due to middlemen. This gap restricts their ability to sell produce at fair prices. Description: Create a mobile application that connects farmers directly with consumers and retailers. The app should include features for listing produce, negotiating prices, and managing transactions, thereby reducing dependence on intermediaries. Expected Solution: A user-friendly mobile platform that enables farmers to showcase their products and connect with buyers directly, enhancing their income potential. It is Developed in 6 <sup>th</sup> semester .

<b>Name of the Project</b>	<b>Bank Management System(ATM)</b>
<b>Languages used</b>	<i>Java Swing and MySQL</i>
<b>Description</b>	It was developed in my 4th semester. A Bank Management System (BMS) is a software application designed to manage and streamline the operations of a bank or financial institution. It facilitates efficient handling of banking services, transactions, and customer data, providing a secure, scalable, and user-friendly solution for both customers and bank employees.

<b>Name of the Project</b>	<b>Ticket Booking Application</b>
<b>Language used</b>	<i>XML, Java, Backend:-Firebase</i>
<b>Description</b>	It was developed in my 5th semester. A Ticket Booking App is a digital platform that enables users to book tickets for various services and events, such as transportation or travel. It provides a user-friendly interface and backend functionalities to streamline the booking process, handle payments, and manage reservations efficiently.
